Adjustable Radio Pouch Size:

1-1/2" X 2-1/2" X (4" to 8 " Tall Radio)

The RCH-601P is designed to create a system which quickly provides identification and professionalism for yourself and other members of your group. It has the same overall features as the RCH-601, but the RCH-601P Radio Holster has two Velcro Base Patches sewn onto the front and back of the radio chest harness. These base patches allow you to place custom identification patches on some or all members of your group. The universal sizing radio pouch is capable of handling just about any medium to large hand-held two-way radio on the market. To see how this two way radio holster works or in use, click images above.

AFH-104

Adjustable Flashlight Holder-104

The AFH-104 Adj Flashlight Holder is a 2" x 8-3/4" strip of Nylon webbing and Velcro that wraps and cinches in a circular shape to perfectly fit the Barrel of your flashlight.

AFH-104 shown in use with the RCH-101U

Flashlight head must be larger than the Barrel to keep your flashlight from slipping through the AFH-104 Flashlight Holder

How to convert the USH-300 Rear Pouches Into One Pocket

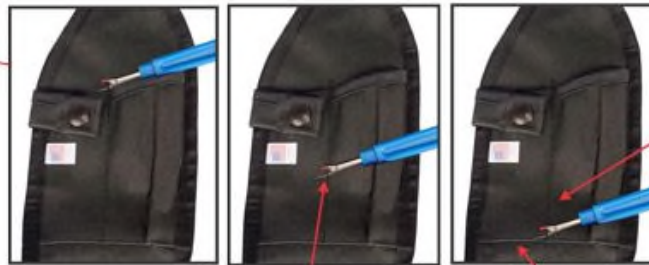

This Process is for all USH-300 Shoulder Holsters, Double, Left and Right.

Step 1,

Start by Slipping The "Point"
Of The Seam Ripper Under
The Thread And Work The
"Point" All The Way Back To
The "Cutting Blade" And Cut.
Continue Step 1
Down the Pouch Until You
Reach the Bottom.

Important Cut The Thread Only

New Pouch Size:
1" x 3-1/2" x 4-1/2"

Midway Position, Carefully Continue
Down Pouch And Try Not To Cut Fabric!

"DO NOT CUT BOTTOM STITCH"

Ending Position Your Donel
Remove All Cut Thread.

Utility Rating ★★★★★

Can Be Converted From Two
Pouches To One Without
Compromising The
Holster's Integrity!
